

As scientists we'll be finding out about the human body, naming body parts and discovering the five senses.

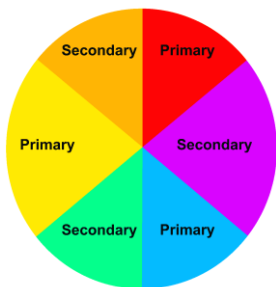

As artists we will be drawing our own superhero portraits inspired by the art work of Roy Lichtenstein. We will be using the 'sausage and egg' technique to help us with our drawings. We will also look at primary and secondary colours

As athletes we will be learning some warm up games and activities and working on different movement skills.

As digital citizens we will be learning how to keep ourselves safe online.

As musicians we will be learning how pulse, rhythm and pitch work together.

The Colour Wheel

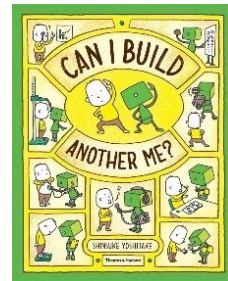

## Super Humans Autumn 1 Weeks 3-7

As writers we will be learning a text map for *We're Going on a Bear Hunt*, innovating as a class and then inventing our own version.

The children will also be encouraged to write their own stories and information in our Authors Hut in the classroom.

As readers we will be making predictions about the books we are reading and retelling the stories we have read. We will also work on using our phonics to decode unknown words.

As mathematicians we will be consolidating our knowledge of numbers to 10 in our place value unit. We will count, order, compare, find one more and one less. We will also be solving problems and developing our reasoning skills.
